

A full upgrade

ComfortGel Full is a significant advancement for patients who need a full-face mask.

Proven comfort and an all-new design make the ComfortGel Full our best full-face mask ever – and a sensible choice for more of your patients.

A comfortable forehead cushion and enhanced StabilitySelector combine with our popular blue gel replaceable cushion to create a level of comfort and stability unlike any other full-face mask. The unique sure seal technology (SST) provides a membrane-thin layer over the gel cushion to closely follow facial contours of both men and women, allowing more wearers to quickly achieve the comfortable seal they need. With ComfortGel Full, your full-face mask patients finally have a simple and sensible way to enjoy the restful sleep they need. It's one more way we're helping you fit 100% of your patients, 100% of the time.

PHILIPS

RESPIRONICS

Premium forehead pad improves comfort and fit.

Premium headgear increases patient comfort and mask stability.

StabilitySelector moves freely and is easy to adjust.

O₂ pick-off port for pressure measurement or O₂ bleed-in.
